

## Press Release

### Compact 14 – Electric Scissor

Placing the client and innovation at the core of the company's mission, has enabled, the world's number 3 manufacturer of aerial work platforms, to develop a complete range of more than 60 models.

This drive to innovate gives rise to numerous new machines every year and makes Haulotte Group the specialist of people and material lifting equipments.

Warehouses are increasing in height due to storage costs and lack of space. There is a higher demand for machines that can be used inside for working in racking systems for inventories and for building maintenance. With **Compact 14**, Haulotte Group is the first worldwide and full-range company to manufacture on this market segment: lightweight & compact 14m electric scissors.

By adding 2 meters of working height to an electric scissor, it has more renting possibilities:

- ✓ Racking: Compact 14 can reach upper shelves
- ✓ Maintenance: Compact 14 can reach higher ceilings
- ✓ ...

#### ➤ **Easy to manoeuvre**

With Compact 14, tasks are done more quickly. As it is driveable at full height, there is no need to descend to drive from one point to another one.

With a width of 1.20m and folding handrails, Compact 14 is very compact.

Thanks to its lightweight (only 3170 kg), fuel consumption is reduced during the operations of transport.

#### ➤ **Comfortable**

Haulotte Group is well-recognized for building machines which are user friendly. In the same manner, Compact 14 is very comfortable thanks to its smooth steering system and its progressive movements.

#### ➤ **Total safety**

Haulotte Group develop efficient machines by keeping in mind the users' safety. Users are safe working with Compact 14 thanks to pothole protection, load management system in the platform and 2-directions tilt controller.

➤ **Optimal productivity**

All the characteristics developed above offer many advantages which allow an optimal productivity.

Furthermore, the **Compact 14** has a gradeability of 23 % and a load capacity of 350 kg (3 people).

➤ **Easy to maintain**

The free wheeling device and the integrated forklift pocket into the frames facilitate loading and the unloading for transporting. The **Compact 14** has also towing hooks. Maintenance is facilitated by the access to batteries in a sliding tray. Finally, the battery charger has an automatic stop.

The self-diagnosis system eases the maintenance and reduces downtime.

Offering maximum safety, **Compact 14** complies with the latest labour regulations, to European (EC marking, EN 280) and also international standards (AS ...).
