

**HTL 4010, HTL 3510 and HTL 3210
New 10 m Haulotte telescopic handlers**

Placing the innovation for our customers at the centre of our company, has enabled the world's number 3 manufacturer of aerial work platforms, to develop full product lines of products which are safer and more efficient to use than ever before.

Designed to lift loads at a height of up to 10 m, the new range of telehandlers (HTL 4010, 3510, 3210) is dedicated to construction and industry. These 3 new machines, add to Haulotte's existing 4 machines of 14 and 17 m.

These 3 machines are setting new standard in lifting performance by raising the maximum capacity and reach in a length under 5 m.

With the new Haulotte 10 m telehandler range, the professionals of construction and industry will not have to choose between compactness and performance.

HTL 4010, 3510 and 3210 keep the precision and user comfort of bigger Haulotte Telehandler by having Hydrostatic transmission and full proportional joystick control as standard.

Each of the 3 new Telehandlers enables Haulotte to offer proper solution in that range from leading performance to optimised profitability.

Compact and strong

The 3 new HTL 10 m share common compact design:

- True 10 m with over 10 m maximum fork height
- Leading maximum forward reach with 7,2 m
- with 5 m length to offer best manoeuvrability.
- with the new boom with smooth design offer maximum visibility on the right side keeping easy maintenance.

HTL 4010 and 3210 are fitted with stabilizers that are deployed in the 2,26 m width of the machine to permit load lifting in tight working area.

HTL 3510 is equipped with frame levelling for optimised mobility and quicker load positioning.

Leading lifting performance**HTL 4010 with Stabilizers**

4000 kg maximum lifting capacity

1200 kg at maximum reach

HTL 3210 with Stabilizers

3200 kg maximum lifting capacity

850 kg at maximum reach

HTL 3510 with frame leveling

3500 kg maximum lifting capacity

500 kg at maximum reach
